## Skills

### Technical skills

JAVA

### Operating System

Linux

Windows

## Projects

### Sign Language Detection by Machine Learning

One of the non-verbal communication techniques utilised in sign language is the hand gesture. It is mostly used by deaf and dumb individuals to communicate with other people or among themselves when they have hearing or speech issues.

So,Inorder to enable deaf and dumb people communicate with normal people and each other more efficiently, software that can automatically detect sign language is presented by this project.
